Today, we bring the advantages of leading-edge technology to thousands of publishers ranging from small businesses to industry giants throughout the world.

### Engine Oil Dipstick

The engine oil dipstick is a flexible metal rod that slides down the oil dipstick tube into the oil pan to measure the oil level. Located on the front or sides of the engine, the dipstick may have a T-shape or oval-shaped handle with an image of a dripping oil can. Only check the oil with the engine turned off to prevent hot oil from spewing out of the dipstick tube.

The location of the oil dipstick depends on whether your vehicle has an in-line engine (rear-wheel drive) as shown here. If you have a transverse engine (front-wheel drive) your dipstick should be located near the front of the engine, as shown here. Insert the stick back into the pipe. If the dipstick gets stuck on the way in, turn it around.
